April 2021

PROJECTS

Cybersecurity Awareness Website [[Github](#)]

- Developed an interactive cybersecurity awareness platform to educate users on online safety.
- Implemented quizzes, blog sections, and API integration to display real-time security updates.
- Designed an intuitive UI with React.js and TailwindCSS for a seamless user experience.
- Provided a resources section with best practices and latest cybersecurity threats.

Blogging Platform [[Github](#)]

- Built a fully functional blogging platform with React.js and Firebase authentication.
- Implemented user authentication and role-based access control for content management.
- Designed a clean and minimalistic UI with responsive features.
- Enabled CRUD operations for blog posts, allowing users to create, edit, and delete articles.

Amazon Clone [[Github](#)]

- Accurately replicated Amazon's layout, styling, and responsiveness for a real-world look.
- Designed with precision in fonts, colors, and spacing to match the original site.
